

# METAL EMBOSsing WITH ELSA GRIGG

4th May 2023 – Lyme Regis

## EVENT OVERVIEW

Metal embossing is created using simple hand tools as if they were a pencil, pressing a design into a thin sheet of metal which can range from pewter and brass to copper and aluminium.

Different surface treatments can add to the depth, texture and or colour of the design.

Once the metal is embossed you can frame your work of art or apply it to a wide variety of surfaces.

## QUOTE

Very absorbing and supportive session

**WE ALL CAME AWAY WITH SOMETHING WE HAD CREATED TO BE PROUD OF. A LOVELY IDEA TO DO THIS WORKSHOP.**

## TESTIMONIALS

**EASY TO LEARN, VERY THERAPEUTIC. I BOUGHT SOME PRODUCTS FROM THE TEACHER TO CARRY ON AT HOME. HIGHLY RECOMMEND.**

## THANKS TO

Elsa Grigg
